  32. Soapwort
  33. Meadowsweet
- \*\* because this quad changes every  
year, according to the Hort. Center's  
theme, many of the plants are  
annuals and do not come back after  
winter. This list is only plants that  
come back as perennials every year.

Each of the quadrants in this Herb Garden are grown and identified by their usefulness and purposes. The **HISTORICAL** section refers to plants that were used by Native Americans, Pioneers and ancient peoples to help maintain wellness and treat ailments. The **FRAGRANCE** section refers to plants that have beautiful scents and are known for their meanings and are used in perfumes and other scented products. The **THEMED** section relates to the annual theme that the *ISU HORTICULTURE CENTER* promotes as an idea or a focus from which to design and display plants. The **CULINARY** quadrant is a selection of plants grown for seasoning food and cooking as well as being beautiful, historical, and sensual!
